

JC - SCHOOL ATTENDANCE AREAS

Attendance areas for each District school shall be recommended by the superintendent and/or a committee formed to review school attendance areas and approved by the Board, based on geography and student population projections. The superintendent, in consultation with the Board, will determine whether to form a committee to review school attendance areas.

In establishing school boundaries, consideration shall be given to the densities of students in an area in relation to the relative capacities of the schools, the equalization of enrollments in classrooms, choice/open enrollments, and efficient use of transportation resources.

District staff shall review enrollment trends on a regular basis and recommend attendance area/boundary adjustments as needed. District guidelines on building capacities, as well as other relevant data, will be used in the planning and review process. District staff shall provide for and obtain community and staff feedback on proposed boundary changes, that may include the formation of a committee. A summary of the feedback along with the recommendations will be provided to the Board. The Board is responsible for approving school attendance areas.

The designated attendance area of a student shall be based on the student's residence as determined by application of Colorado law.

Adopted by Board: May 22, 1995
Revised by Board: January 27, 1997
Revised by Superintendent: June 16, 2009
Revised by Superintendent: November 23, 2009
